

## REMARKS

Claims 1-11, 13-24, 26-30, 33-38 and 40-46 are in this application and are presented for consideration. Claims 1, 8, 22, 41, 44, 49 and 51 have been amended. New claims 52 through 56 have been added. The claims have been amended to place the application in better form.

In response to the restriction requirement, Applicant hereby elects the species of Figures 1A - 1B for initial examination. Claims 1-5, 7-11, 13, 18-24, 26, and 41-54 are readable thereon. These claims are generic as they read on all species presented. In particular applicant notes that the light emitting elements shown in figures 1A and 1B could be placed in any of the arrangements shown in the other species.

Applicant also notes that the separate species of figures 7 and 8 relate to a manufacturing method for the species of figures 1A and 1B. Is applicant's position that the product that is claimed cannot be made by another materially different process than the process shown in figures 7 and 8. It is also applicant's position that the process as claimed cannot be used to make other and different products. Therefore the species of figures 1A and 1B is generic to the species of figures 7 and 8.

If the Examiner has any comments or suggestions which would further favorable prosecution of this application, the Examiner is invited to contact Applicant's representative by telephone to discuss possible changes.

Favorable action is respectfully requested.

Respectfully submitted  
for Applicant,

By:
